TEAL
ALWAYS CHALLENGING IT

OUR APPROACH
AGAINST CREDENTIAL THEFT

TEAL
ALWAYS CHALLENGING IT

# Data theft is more likely than catching the flu...

... and for sure significantly more expensive - some average numbers

ARE YOU NEXT?

Due to the large number of attacks and the continuous shift of company boundaries (cloud computing, company acquisitions, managed services...), it is only a matter of time before a break-in succeeds.

Our Secure Administration Environment (SAE) offers solid protection against such attacks.

$

4,3 M €

IDENTITY IS THE NEW PARAMETER

We demonstrate to your IT team how attackers act to steal your credentials, analyze your environment and plan the necessary steps to sustainably increase your IT security level.

Four pillars to protect your identities

Know your Adversaries
It is important to know the attack methods and techniques in order to take appropriate countermeasures.

Tier the systems
Systems should be classified into tiers based on their value to the company and protection requirements.

Layer the Defenses
The assets should be protected by multiple layers of security based on their tier class.

Monitor and improve
Adversaries adept, improve and so should you. Continual improvement is key to long term success.

Kick-start your journey with in depth workshop

OUR SECURE ADMINISTRATION ENVIRONMENT WORKSHOP…

…will give you a solid understanding of your adversaries, the state of your environment and a plan on how you can improve your security.

WORKSHOP

1.

2.

3.

4.

PREPARE
In a workshop we explain how attackers act, what the current threats are and how to protect yourself.

ANALYZE
Next, we analyze your environment and document the current status.

PLAN
Together, we define the appropriate countermeasures for your environment and create the implementation roadmap.

IMPLEMENT
We help you to gradually implement the measures to steadily and continually increase your security posture.

Who we are

ALEXANDER SCHMITT
Founder

I have been advising my clients for over 10 years. I have already taken on a wide variety of roles. From the "normal" team member to the architect to the project manager, everything was actually there.

FABIAN BÖHM
Founder

As a security consultant my main focus is on Microsoft Active Directory, PKI and Cloud projects. I support our customers in improving the security level in a sustainable way and in detecting attacks at an early stage.

MANUEL HOFFMANN
Founder

I mainly plan and manage infrastructure projects for my clients. My strengths lie above all in the technological implementation of compliance and governance requirements.
